

i-suit[™]

Washing
windows
without the
struggle

Designed for relief

No more shoulder injuries and back pain while washing the windows, day-in, day-out.

The i-suit feels like a mobile backpack, with a steel tube attached and bent towards a pulley mechanism. Increasing the productivity of their workers, working ergonomically and responsibly, and decreasing psychical strain. The i-suit surely is an eye catching innovation changing the way window washing is done forever.

Fast on the job

Working with the telescopic pole in combination with the i-suit, allows you to work three times as fast. No more carrying and constantly replacing a ladder to reach the spots you want to clean.

Key features

High-pressure washers

Easily clean stained walls & windows with a high-pressure washer with this accessory to your i-suit lance. Use our rubber sleeves to fit in different pole sizes ranging from Ø 27, Ø 32 and Ø 38 mm.

i-suit glasses

We created glasses that borrow the elements of belay glasses: the first product for safety and security. This allows you to concentrate, and have a great overall vision of your work area.

Backpack & lance

All of the weight is centered and lifted from the middle, and allows you free movement, less strain and better visibility of your target areas.

Technical specifications

Weight of product	3.9 kg
